

Large Group Discussion 1.13.10 (2:15 p.m. – 3:30 p.m.)

Immediate Goals

- Survey students – about technology abilities and further learning
- Develop our current wiki site or create a blackboard site as a better means of communication together? Facebook /internet safety issues?
- Research technology options to inform our next steps.
- Identify cutting edge happenings in each of our buildings - in-house field trips.
- How might we find the time to share/collaborate to create and integrate learning experiences for ourselves and our students - teaming and block scheduling possibilities/Do we have the architecture to manage this?
- How can we make our work together organic? What is the work?
- Use the new technologies to enhance teaching and learning in our own practices within our group.
- Visit others schools where this integration is happening to find out how.
- What are our next steps moving students forward with 21st century learning?
- Have students help us be reflective of our own practice.

We need to know where we are currently to move to the next step/partnerships in this work.

Long-term Goals

- Classroom practice will take on a different look because of this group's collaboration then sharing out.

Our Direction

Let our lens be the Partnership for 21st Century Skills – organizing our current work and the resources that promote these skills.

Next Steps

- Populate our wiki with biographies, the current work that is happening in our classrooms and the challenges that we face moving forward as well as next steps
